

## Plans and elevations

- Drawing plans and elevations of 3-D shapes
- Identifying nets of cubes and cuboids

Keywords

You should know

### explanation 1

**1** Which of these 3-D shapes are prisms?

A prism has the same cross-section at any point along its length.

**2** Which of the 3-D shapes in question 1 match to each plan below?

**3** Which of the 3-D shapes for question 1 match to each side elevation below?  
Each elevation shows the shape as seen from the right.

**4** Each diagram shows a 3-D shape made from cubes.

**i** Draw a plan of each shape.

**ii** Draw a side elevation of each shape, as seen from the left.
