

Translation

- Describing a translation
- Translating a shape

Keywords

You should know

explanation 1

- 1** The translation $D \rightarrow A$ is right 4 and up 2.
Describe these translations in the same way.

- | | |
|----------------------------|----------------------------|
| a $A \rightarrow B$ | b $A \rightarrow C$ |
| c $B \rightarrow A$ | d $C \rightarrow A$ |
| e $D \rightarrow B$ | f $A \rightarrow E$ |
| g $A \rightarrow D$ | h $E \rightarrow A$ |

- 2** Shapes Q, R, S and T are translations of shape P.

Copy shape P and use these instructions to draw shapes Q, R, S and T.

- a** $P \rightarrow Q$ is right 5 and up 2.
- b** $P \rightarrow R$ is left 4 and up 1.
- c** $P \rightarrow S$ is right 1 and down 3.
- d** $P \rightarrow T$ is left 3 and down 2.

- 3** P is mapped to Q by the translation 3 squares right and 2 squares down.
Describe the translation that maps Q to P.

- 4** In this diagram, each shape can be mapped to one other by a translation.

Copy and complete the mappings below.

Each stands for one of the shapes A to H.

Describe each translation.

The first one has been done for you.

a $A \rightarrow \square$

Answer: $A \rightarrow D$. 2 units right and 3 units up.

b $\rightarrow F$

c $J \rightarrow \square$

d $\rightarrow I$

e $B \rightarrow \square$

- 5** In this diagram, triangle ABC is mapped to triangle DEF by a translation.

The coordinates of A are (1, 3).

- a** What are the coordinates of D?
b Describe the translation of triangle ABC to triangle DEF.

- 6** In this diagram, triangle ABC is mapped to triangle DEF by a translation.

- a** Write down the coordinates of A and D.
b Describe the translation.
c Find the coordinates of E and F.

7 In this diagram, triangle XYZ is mapped to triangle PQR by a translation.

- a** Write down the coordinates of Y and Q.
- b** Describe the translation.
- c** Find the coordinates of P and R.

8 The diagram shows a triangle and two mirror lines M_1 and M_2 .

- a** Reflect the triangle in M_1 .
- b** Reflect the image in M_2 .
- c** Describe the translation that is equivalent to the two reflections.
